You are invited to our Annual Awards Luncheon Celebrating our Volunteers and Partners

Saturday, June 6, 2026

Noon–3:00pm

Franklin Canyon Park, Beverly Hills

Sooky Goldman Nature Center

Honorees:

Charlie Wilken, Service Award

Wallis Annenberg Wildlife Crossing, Conservation Award

\$45 per ticket /\$80 for two (reserve by May 31)

The Wallis Annenberg Wildlife Crossing, is a vegetated overpass currently under construction in Agoura Hills, at Liberty Canyon. The bridge will be a critical wildlife crossing, spanning the ten-lane Ventura Freeway, connecting the Simi Hills with the isolated Santa Monica Mountains. This visionary structure will preserve biodiversity across the region by connecting an integral wildlife corridor, and help save a threatened local population of mountain lions from extinction. When complete, the crossing will be the largest in the world, the first of its kind in California, and it will serve as a global model for urban wildlife conservation. Lauren Gill, Deputy Director of The National Wildlife Federation, California, and the Save LA Cougars Campaign will accept our Conservation Award.

Charlie Wilken, Service Award, has been our outreach chair for four years and has tabled many events from Malibu to Hansen Dam to the LA River. He is very enthusiastic about the Merlin app and has taught college workshops on it as well as docent training classes. He teamed up with Art Langton about three years ago and they added Art's taxidermy collection to the outreach mix. When Art passed away last spring, Charlie took on the task of organizing and maintaining the collection making it a focal point at our events.

—Prior to the luncheon—

Bird Walks: Join Alexander deBarros or Susan White, 10:00 AM, at the Nature Center. Alexander's group will head out on the park trails. Alternatively, Susan's group will go for a lakeside stroll to spot local birds and discuss the vital role native plants play in our ecosystem.

Watercolor Workshop: Cassandra Cunningham invites you to join a nature journaling class at Heavenly Pond, a short walk from the parking lot near the Sooky Goldman Nature Center. She will explore color theory and practice plein air painting with the group. All experience levels are welcome. Meetup is at 9:30 AM. There is a \$10.00 reservation fee, and the class is limited to 10 participants. All art materials will be provided.

Photography: Birding with a Camera 101: David Barton will lead this session focusing on using the camera as a tool to improve your birding skills. The group will meet at the Nature Center at 10:00 AM. Please bring a camera and a guidebook if you have one. There is a \$10.00 reservation fee, and the group is limited to 10 participants. [Get Tickets](#)

Calendar of Events

To reach an event leader call our message forwarding service at (747) 237-3720

JUNE 2026

Saturday, June 6. Annual Awards Luncheon. Franklin Canyon Park, at the Sooky Goldman Nature Center, at 2600 Franklin Canyon Drive, Beverly Hills. Noon—3pm. Please

join us as we celebrate our Honorees: Charlie Wilken, Chapter Service Award, and the Wallis Annenberg Wildlife Crossing, Conservation Award. Tickets are available through May 31—don't miss out! Tickets are \$45 for one or \$80 for two and may be purchased [HERE](#).

Sunday, June 7. Sepulveda Basin. 8:00—11:00 a.m. Directions: Exit the San Diego Freeway (I-405) on Burbank Blvd. Go west about one-half mile to Woodley Avenue and turn right (north). Travel about one-half mile to the second possible right turn (at sign for the Water Reclamation Plant and Japanese Garden). Turn right and go east about one-half mile to Wildlife Area parking at the end of the road. Park in the lot and walk past the low, rock-faced buildings to our meeting place on the other side of the buildings. Leader: Alexander deBarros, Alexander.deBarros@sfaudubon.org.

Thursday, June 11. Bird Sit with Nature Journaling, O'Melveny Park. 10:00—11:45 a.m. If you would like to mindfully connect with birds

and all of nature, join us at O'Melveny Park—at the picnic tables near the bathrooms. (Rain cancels and moves it to the 3rd Thursday.) What to bring: a cushion or a comfortable chair, a beverage/snack, binoculars, a journal, and something

to write/draw with. This event is limited to 10 people. To reserve a spot, contact Teri Carnesciali at teri.carnesciali@sfaudubon.org. Co-leader: Mary Lou Sharp.

Saturday, June 13. Beginner Bird Walk. Second Saturdays. 8:00—10:00 a.m. at the Sepulveda Basin Wildlife Reserve. (Note earlier start time) We welcome beginning birdwatchers, families, and groups by arrangement. This is a great opportunity to learn how to identify birds, their behaviors, and needs. You will also learn about the outstanding and currently challenged wildlife reserve. Each walk will vary with the interests of the participants. Binoculars are available to borrow. Please do not bring any pets. Wear sturdy shoes, layered clothing, and hat with a brim. Water and sunscreen suggested. Directions: Driving on Woodley Ave. north from Burbank or south from Victory Blvd., go ½ mile and turn east at the sign for the Japanese Garden. Continue straight (don't turn into the garden) and drive past the cricket fields and around the tree in the middle of the road, continuing to the parking lot at the end of the road. Meet at the small amphitheater which is on the on the south side of the rock-faced buildings. GPS coordinates of parking lot: 34.179942,-118.472595. For more information, call Natalie Beckman-Smith at (818) 926-7825 or San Fernando Valley Audubon at (747) 237-3720. Heavy rain cancels. Please let us know in advance if you are bringing a group of people so we can provide enough leaders. If you have a large youth or special interest group we can try to arrange a walk at a different time to meet your needs.

Monday, June 15. Board Meeting. 7:00 p.m.

Sunday, June 21. Malibu Creek State Park. 8:00 a.m. Meet at the second (lower) day-use parking lot. Entrance to the park is on the west side of Las Virgenes Road, just south of Mulholland Hwy. Entrance fee is \$12 per car. Leaders: Katheryn Barton and David Barton. kathy.barton@sfaudubon.org.

Reminder: RAIN CANCELS birding events. Groups of six or more, please contact the leader.

No General Membership Meetings June–August

Have a great summer!

Saturday, June 27. Hansen Dam Birding. 8:00—10:00 a.m. 10965

Dronfield Ave., Pacoima. Dronfield Ave. intersects Osborne St. approximately ½ mile south of Foothill Blvd. Turn into the park on Dronfield, and meet near the ranger station. Accessibility is good for this site which is mostly on a packed dirt road. Leader: Pat Bates, pat.bates@sfaudubon.org.

Saturday, June 27. Sepulveda Basin Wildlife Reserve Habitat Restoration. 8:00—Noon. SFVAS is continuing to work with our

partners, the Friends of the Los Angeles River (FoLAR) and the California Native Plant Society (CNPS) on the ongoing Habitat Restoration efforts in the Sepulveda Basin Wildlife Reserve (SBWR). This group gathers every Fourth Saturday morning to work and weed. If you would like to get involved and get your hands dirty, this is for you! SFVAS offers an Audubon guided walk after the work. (Volunteer Walk Leaders always needed.) What is this all about? Please check the [FoLAR](#) website for latest details and sign up before attending this event.

JULY 2026

Sunday, July 5. Sepulveda Basin. 8:00—11:00 a.m. Directions: Exit the San Diego Freeway (I-405) on Burbank Blvd. Go west about one-half

mile to Woodley Avenue and turn right (north). Travel about one-half mile to the second possible right turn (at sign for the Water Reclamation Plant and Japanese Garden). Turn right and go east about

one-half mile to Wildlife Area parking at the end of the road. Park in the lot and walk past the low, rock-faced buildings to our meeting place on the other side of the buildings. Leader: Alexander deBarros, Alexander.deBarros@sfaudubon.org.

Saturday, July 11. Beginner Bird Walk. Second Saturdays. 8:00—10:00 a.m. at the Sepulveda Basin Wildlife Reserve. We welcome

beginning birdwatchers, families, and groups by arrangement. This is a great opportunity to learn how to identify birds, their behaviors, and needs. You will also learn about the outstanding and currently challenged wildlife reserve. Each walk will vary with the interests of the participants. Binoculars are available to borrow. Please do not bring any pets. Wear sturdy shoes, layered clothing, and hat with a brim. Water and sunscreen suggested. Directions: Driving on Woodley Ave. north from Burbank or south from Victory Blvd., go ½ mile and turn east at the sign for the Japanese Garden. Continue straight (don't turn into the garden) and drive past the cricket fields and around the tree in the middle of the road, continuing to the parking lot at the end of the road. Meet at the small amphitheater which is on the on the south side of the rock-faced buildings. GPS coordinates of parking lot: 34.179942,-118.472595. For more information, call Natalie Beckman-Smith at (818) 926-7825 or San Fernando Valley Audubon at (747) 237-3720. Heavy rain cancels. Please let us know in advance if you are bringing a group of people so we can

provide enough leaders. If you have a large youth or special interest group we can try to arrange a walk at a different time to meet your needs.

Sunday, July 19. Malibu Creek State Park. 8:00 a.m.

Meet at the second (lower) day-use parking lot. Entrance to the park is on the west side of Las Virgenes Road, just south of Mulholland Hwy. Entrance fee is \$12 per car. Leaders: Katheryn Barton and David Barton. kathy.barton@sfvadubon.org.

Sunday, July 25. Hansen Dam Birding. 8:00—10:00 a.m.

10965 Dronfield Ave., Pacoima. Dronfield Ave. intersects Osborne St. approximately ½ mile south of Foothill Blvd. Turn into the park on Dronfield, and meet near the ranger station. Accessibility is good for this site which is mostly on a packed dirt road. Leader: Pat Bates, pat.bates@sfvadubon.org.

Saturday, July 25. Sepulveda Basin Wildlife Reserve Habitat Restoration. 8:00–11:00 a.m.

SFVAS is continuing to work with our partners, the Friends of the Los Angeles River (FoLAR) and the California Native Plant Society (CNPS) on the ongoing Habitat Restoration efforts in the Sepulveda Basin Wildlife Reserve (SBWR). This group gathers every Fourth Saturday morning to work and weed. SFVAS offers an Audubon guided walk after the work. (Volunteer Walk Leaders always needed.) NOTE: Start time may be subject to change. Please check the FoLAR website for latest details and sign up before attending this event.

Pat Bates Honored with San Fernando Valley United Chambers of Commerce 2026 Inspirational Women Award

Pat Bates, was one of five local women honored at a luncheon, May 7, receiving the Inspirational Women Award. Pat earned a PhD in Experimental Psychology/Biology at the University of Arizona, recycled to a 35-year CPA practice as a partner at a local Encino firm, continues forays into the art world, and is happiest working outdoors. Pat has forged a long relationship with the Los Angeles City Fire Department, including helping with an LAFD native pollinator garden, advising on vegetation management, and participating in disaster drills and preparation. In 2025, Pat was selected to be the San Fernando Valley Fire Chief of the Year.

Pat will begin her term as president of the San Fernando Valley Audubon Society in July, and is currently the chair of the Sepulveda Basin Wildlife Areas Steering Committee. A major recent SFVAS accomplishment was, with \$15,000 of SFVAS funds and with the help of the Los Angeles Mayor's office, Council District 6, the LAFD, Recreation and Parks, and the U.S. Army Corps of Engineers, underwriting a pilot goat grazing project in the Sepulveda Basin. Congratulations Pat on the well-deserved recognition!

Mississippi Kites at Dusk: A Lesser-Seen Behavior *By Ryan Carter, SFVAS Director-at-Large*

During a recent trip through El Paso and into New Mexico, I spent time observing the Mississippi Kite (*Ictinia mississippiensis*) in an environment where they are seasonally present. Like many birders, I've always associated kites with their graceful flight, light, buoyant, and almost effortless as they move through the open sky in search of insects.

But what stood out on this trip wasn't their aerial hunting. It was what happened later in the day.

As the light began to soften toward evening, individual kites that had been scattered across the landscape started to converge. At first, it was subtle, one or two birds drifting toward an open field, but within minutes, the pattern became clear. Several individuals gathered in the same area, settling into what appeared to be a communal roost.

From a distance, the behavior might go unnoticed. The birds remained relatively quiet, perching high and spaced just enough to blend into the structure of the trees. There was no dramatic display, no large flocks swirling or calling attention to themselves. Instead, it was a calm, almost understated transition from motion to stillness.

Watching this shift offered a different perspective on a species most often appreciated for its flight. The Mississippi Kite is typically observed in motion, cutting through the air with precision. Seeing multiple individuals come together at day's end revealed a quieter side of their behavior, one that suggests both social tolerance and a shared use of space that isn't always obvious during the day.

Moments like this are a reminder that even familiar raptors can surprise us. With a bit of time in the field and a willingness to observe beyond the obvious, behaviors that

might otherwise go unnoticed begin to emerge.

While the elegance of a kite in flight is hard to overlook, it's these quieter moments, when the day winds down and activity shifts, that often leave the strongest impression. 

Birdathon 2026 at Malibu Creek State Park *By David J. Barton*

Kathy and I regularly lead SFV Audubon’s monthly bird walk at Malibu Creek State Park, and we did so again in April 2026. As in prior years, we dedicated one of our regular spring bird walks to a very special event: Birdathon 2026! The chapter’s major annual fundraiser for its environmental education programs, Birdathon creates the opportunity for donors to pledge funds for these programs in different ways—not only in a designated total amount, but

Song Sparrow

also by pledging a specified amount per bird species observed by their selected team of birders.

Birdathon always gives Kathy and me an extra added incentive to find as many species as possible at Malibu Creek State Park, and this year was no exception. Fortunately, last year’s terrible fires did not damage habitat at the park.

We arrived at the park shortly before 8 a.m. on April 19. The weather was lovely, initially about 55 degrees Fahrenheit with crystal blue skies, and quickly warmed up.

Blue Grosbeak

Our count group met at the usual spot in the parking lot, near the park trailhead. Team Barton was an astonishing 30 strong this year, including regulars like Chris and Ruth Tosdevin, Marie Bainbridge, Karen Ellis, and Chris Lord as well as some newcomers, including first-time birders like Rick Gruber. Some were chapter members; others not. Their ages ranged from early twenties to retired “senior citizens.” All were eager to hit the paths through the chaparral and riparian oak woodland of this gem of the Santa Monica Mountains.

After introductions, announcements, and safety instructions, we got started. Avian activity was vigorous from the outset. Among our first sightings was a swarm of Cliff Swallows and a family of California Quail, ticked before we could hardly leave the parking lot! Acorn Woodpecker, Ash-throated Flycatcher, and California Scrub-Jay followed in rapid succession.

We first tackled the fields near the campground, where Spotted Towhees, Northern House Wren, Oak Titmouse, and Northern Yellow Warbler sang almost constantly. There, we were treated to outstanding views of Yellow-breasted Chat, Lazuli Bunting, Blue Grosbeak, and Western Tanagers. Wow!

As we continued down the trail, we had good looks at a pair of nesting Red-tailed Hawks and found a pair of Northern House Wrens entering and exiting a tree cavity. California Towhee, Yellow-rumped Warbler, and White-breasted Nuthatches added to our delight.

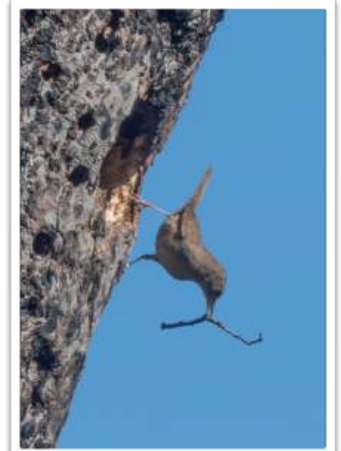

Lazuli Bunting

We then returned to the trailhead after a brief restroom break, and headed down the path to Crag’s Road. At Las Virgenes Creek, we found a pair of Western Bluebird carrying food into a tree cavity. A bit further on, descending to the water’s edge at Malibu Creek, we enjoyed stunning views of chattering Red-winged Blackbirds and soaring American Kestrels while ticking off ducks, egrets, and cormorants for our list. American Bullfrogs impressed us with their size and entertained us with their amusing calls.

Stopping briefly at a picnic table along Crag’s Road, we caught ourselves up on the day’s checklist. There, we enjoyed freshly-baked banana bread, courtesy of Chris Tosdevin, while we tallied up the species count. Fortified, we proceeded to the Visitor Center, finding a mated pair of Black Phoebes entering and exiting a cavity in a creekside boulder, carrying in food and carrying out fecal sacs.

In under four hours, Team Barton had logged a whopping 56 species! Kathy and I were proud of our team of birders, but most importantly we were pleased to have raised cash for the worthy (*next page*)

Northern House Wren
Photo: Katheryn Barton

cause of environmental education. We were also pleased to be able to observe so many breeding behaviors, which we were careful to note with breeding codes in our eBird submissions in support of the newly organized California Bird Atlas.

For a full list of the birds observed at Malibu Creek State Park during the 2026 Birdathon event, as well as photos of many of the birds we saw, we invite you to take a look at our eBird checklist. You can find it by entering <https://ebird.org/atlascalifornia/checklist/S324423924> on your browser. We also invite you to join us on the third Sunday of any month for our regular bird walk at the park. Details can be found at <https://sfvaudubon.org/event/malibu-creek-state-park/>. 🐦

Extraordinary Hansen Dam Birdathon Bird Walk by Pat Bates

Usually our bird walk groups are not quite this excitable, but the 4' Coachwhip (*Masticophis flagellum*) slithering unseen behind photographer Steve Barbusa got everyone's attention!

It is a pleasure leading the Hansen Dam bird walks for the San Fernando Valley Audubon Society. Our first test walk led to sightings of a pair of Northern Harriers!! We started the walks at Hansen in 2015, and for several years had the walks at Orcas Equestrian Park along the Tujunga Wash with a high point to see Cactus Wrens—there was a large accumulation of nests in cholla thickets there. After fire destroyed a significant portion of habitat at Orcas several years ago, I moved the walk to the dam area. Then the pandemic hit. For at least a year I did the walk alone every 4th Saturday just for historical record. Gradually more and more folks joined informally.

Currently we meet at the Hansen Dam Ranger Station at 0800 every fourth Saturday of the month unless it is seriously raining or officially and very rarely cancelled.

The Hansen Dam is at the confluence of the Big and Little Tujunga Washes. The basin covers 1461 acres, most of it leased to the City of Los Angeles for recreation purposes. The dam was built in 1940 for flood-risk management for portions of the San Fernando Valley and areas

4' Coachwhip (*Masticophis flagellum*)

Blue Grosbeak photo by Steve Barbusa

contiguous to the Los Angeles River. Because the U.S. Army Corps of Engineers often leaves flood waters sequestered for significant periods of time, the Hansen Dam walks are occasionally diverted, shortened and improvised! If conditions are dicey and changing I check the [Hansen Dam Water Data](#) website to see how flooded it is.

Our April 2026 Birdathon bird walk did not disappoint. We saw many species before even getting too far, including a pair of Red-shouldered Hawks. The weather was cool, and the walk to the back side of the lake was pleasant. We eventually registered 47 species of birds including stunning Western Tanagers and Blue Grosbeaks. The number of birds in the lake remains low for undetermined reasons. The area is host to the endangered Least Bell's Vireo—which we detected at four different locations. Interestingly, we found a Brown-headed Cowbird trap placed by the Department of Fish and Wildlife and were there while it was monitored. The cowbirds are brood parasites and further endanger the Bell's Vireos and other smaller song birds. Here is a [link](#) to the eBird list, which has many photos attached. 🐦

Ojai Raptor Center Concert Fundraiser by Joanne Millius

Ken and I attended a fundraiser put on by one of our partner organizations, the Ojai Raptor Center (ORC). It was held Saturday, April 18 at the Ojai Art Center. During the first hour of the fundraiser, snacks and drinks were provided by staff and members of the ORC. While we ate, we mingled with other guests in the backyard of the Art Center. A biofacts table was set up highlighting the type of raptors they care for. This table provided people with the opportunity to handle feathers, bones, and other specimens to better understand key raptor adaptations. They also provided another table with hats and t-shirts for sale.

The second half of the event was an indoor concert. We were ushered into the Art Center and listened to six accomplished musicians that made up the Wild Harmony Chamber Group. The concert featured music written by J.S. Bach, Franz Schubert, and Amadeus Mozart. The musicians also performed a song specifically written for ORC called *The Raptors of Ojai*, by the artist and writer Cody Anderson. The concert featured combinations of wind and string instruments, including the flute, oboe, violin, and viola. It raised around \$8,000 to support young raptors that are taken in by the center during the spring nesting months.

Alyssa Torkelson and Riki Saint John

Ojai Raptor Center is an organization dedicated to the care and protection of wildlife through rehabilitation and release of sick, injured, or orphaned wildlife. They also educate and inspire the community to become stewards of the environment. In 2025 they participated in the treatment of 700 avians, 80 mammals, and 21 reptiles. Although they treat different kinds of wildlife, they primarily treat raptors.

Jaclyn DeSantis

Kim Stroud, the founder of ORC, has served as Executive Director for the past 25 years. In 2025 she stepped down from the director position so that she could again care for the wildlife in a more hands-on capacity. Under her leadership, the Ojai Raptor Center grew into a well-respected rehabilitation facility.

Chris Eksteen, new Executive Director of Ojai Raptor Center

In November of 2025, Chris Eksteen became the next Executive Director of ORC. He brings more than 15 years of leadership in conservation, education, and community engagement. More recently, he served in a senior leadership role at the Cape Leopard Trust in Cape Town, South Africa. He holds a Master's degree in Environmental Education and studied Business Management and Tourism Management.

Moving forward, ORC looks to enhance their facilities, expand their team, and deepen their impact through wildlife education. SFV Audubon has supported the Center over the past few years, and looks forward to supporting them in the future. 🦅

How did you learn about SFVAS?

If you want to join or renew by check, please be sure to include your e-mail address if you want to receive an acknowledgment. We can no longer thank you by regular mail. If you do not have an e-mail address, please know how much we appreciate your involvement with, and support of, SFVAS.

The *PHAINOPEPLA*, published six times a year, is the newsletter of the San Fernando Valley Audubon Society, P.O. Box 7769, Van Nuys, CA 91409. San Fernando Valley Audubon Society is a non-profit chapter of the National Audubon Society, and is dedicated to "Nature Education and the Conservation of Wildlife."

Articles, letters, drawings, and photographs concerning conservation, ecology, birding, chapter activities, and articles of interest to the membership are welcome for publication in the *PHAINOPEPLA*.

Material from other newsletters or newspapers should include the source and date. Copy for the *PHAINOPEPLA* should be in the hands of the editor by the 3rd of the month to be included in the following month's newsletter.

Membership to National Audubon is separate and can be initiated on the website www.Audubon.org.

If you have any questions about membership, renewals, change of address or any other membership concerns, please contact Bill Lepler at (747) 237-3720 or e-mail him at membership@sfvaudubon.org.

For Chapter leaders' e-mail addresses, see our Website: www.SFVAudubon.org

Great News!

San Fernando Valley Audubon Society (SFVAS) is honored to announce that we have been selected California Senate District 27's Nonprofit of the Year for 2026! Thank you California State Senator Henry Stern for recognizing our chapter with this award. SFVAS is a chapter of the National Audubon Society, and has been incorporated since 1906 as the California Audubon Society. Our mission includes the protection of birds and our shared environment through action, advocacy, and education—and we value the support of Sen. Stern in these conservation efforts.

Bird Sit Bulletin by Teri Carnesciali

At our monthly Bird Sit many of us either draw or paint images of the birds we're observing that morning. That can be challenging since the birds are in motion much of the time. One approach is to sketch them quickly. Another is to take a photo then and there and draw from that photo. Either of those approaches accomplishes the purposes of appreciating the birds in the moment and of

jogging our recollection of the experience later on.

At one Bird Sit Claudette Newman was enjoying watching a nuthatch feeding. It was moving all around a tree trunk in typical nuthatch fashion, positioning itself upside down in order to catch insects in the crevices that others might miss while viewing the world right-side up! Claudette decided to show the one little bird in several different positions all at once. We love the result.

You can find more information in the Events Calendar. Contact Teri Carnesciali at teri.carnesciali@sfvaudubon.org, to reserve your spot. The Bird Sit will be on summer hiatus in July and August. 🐦
